

BS Keyless Egress Nightlatch

BS8621:2007

Egress

Features

- This **British Standard Keyless Egress Nightlatch** overcomes the conflict between a secure British Standard accredited front door lock and fire safety recommendations
- The BS 8621:2007 standard mirrors the BS3621:2007 but is for 'escape' locks
- Classified as provided keyless egress at all times, which applies where there is a requirement for an easy action method of opening an external door from the inside without the need for keys or similar devices to unlock
- Especially relevant for entrance doors in multi-residential and other buildings
- The keyless lever on the inside of the door ensures it is possible to make an emergency escape in the event of a fire
- Available in 40mm and 60mm backsets
- Brass Effect, Satin Chrome, Polished Chrome, Satin Nickel and Black finishes are available
