Description	Part No.
Cut Key	WKEY31146

Technical Information

Corrosion resistance

Meets the requirements of BS EN 1670: 2007 Grade 5 (480 hours)

Operation

Tested to 25,000 cycles

Material Specification

Handle:	High quality Zinc for all finishes
Coatings:	Hardex Chrome, Hardex Graphite, Hardex Gold and Antique Black

Maintenance

For continued protection of the quality finish and appearance, we advise routine cleaning of all our external hardware. We recommend wiping it with a clean cloth soaked in warm water and mild detergent every month. Please refrain from using heavy-duty cleaners, containing Chlorine or Potassium. Moving parts should also be lightly lubricated using a light non-acidic mineral oil (e.g., "3 in 1") at least twice per year. The product may need to be adjusted and fixings tightened to ensure a satisfactory operation. This procedure is particularly essential if products are used within a 25-mile radius of coastal areas or close proximity to building sites or large industrial areas, where more frequent cleaning may be required to prevent the accumulation of corrosive contaminants.

All dimensions are in mm and are nominal. Fab&Fix reserves the right to change specification without notice. It is the responsibility of the window manufacturer to ensure that the finished product meets any required safety and performance specification.

Packaging

Handles

Individually bagged with screws and care instructions.
40 handles in an outer box.
