

Berwick TS 007 2 Star Security Lever

Features

- High security door handle compatible with all Euro profile cylinders**
 Achieve PAS 24 with a standard anti-bump cylinder (no need for an anti-snap cylinder)
- Independently tested in accordance with TS 007-1:2014+A2:2018 (TS007 2*) and to EN 1906:2012**
 Easily retrofitted to upgrade security on existing doors. Preparation details are the same as for the Balmoral door handle, ideal as an interchangeable upgrade
- Expertly designed**
 Sculptured backplate discourages any unwanted attention from mole grips, the shape makes gripping the backplate difficult and removal of the external handle impossible
- Solid forged aluminium strengthening plate**
 Acts as a cylinder guard, preventing an attack on the cylinder and the removal of the handle from the door
- Visible 2* TS 007 Kitemark**
 Clearly indicates the handles performance and acts as key visual deterrent to prevent any unwanted interest
- Fully sprung solid handle**
 Sturdy feel that gives a consistent 90-degree lever return. The ergonomic lever and low friction Polymer bush is easy to grip and provides a smooth operating action
- 44mm and 70mm version available to suit varying door thickness**
 Suitable for a wide range of PVCu profiles and composite door slabs
- Tested to the latest version of PAS 24:2012**
 Surpasses the latest security tests for high security door furniture on a new door set (with appropriate 1* anti-bump cylinder).
- High tensile M6 screws with colour coordinated screw heads**
 Secure fixing that perfectly matching hardware, even down to the smallest detail

Cylinder:	Euro Cylinder, 92mm PZ

Maintenance

For continued protection of the quality finish and appearance, we advise routine cleaning of all our external hardware. We recommend wiping it with a clean cloth soaked in warm water and mild detergent every month. Please refrain from using heavy-duty cleaners, containing Chlorine or Potassium. Moving parts should also be lightly lubricated using a light non-acidic mineral oil (e.g., "3 in 1") at least twice per year. The product may need to be adjusted and fixings tightened to ensure a satisfactory operation. This procedure is particularly essential if products are used within a 25-mile radius of coastal areas or close proximity to building sites or large industrial areas, where more frequent cleaning may be required to prevent the accumulation of corrosive contaminants.

Packaging

Handles

Individually boxed with screws, spindle and care instructions. 8 handles in an outer box.

All dimensions are in mm and are nominal.
Fab&Fix reserves the right to change specification without notice.
It is the responsibility of the door manufacturer to ensure that the finished product meets any required safety and performance specification.
