

Fab&Fix

Spoilt for choice...

THE SHIELD RANGE

shield your door from intruders

The Fab&Fix Shield Letterplate range provides the widest choice of TS 008 solutions for a PAS 24 door.

Designed to deflect any unwanted access away from the property through the letterplate. The low projection of the internal flap shields the property within.

Fully colour matched metal letterplate in a range of Fab&Fix finishes

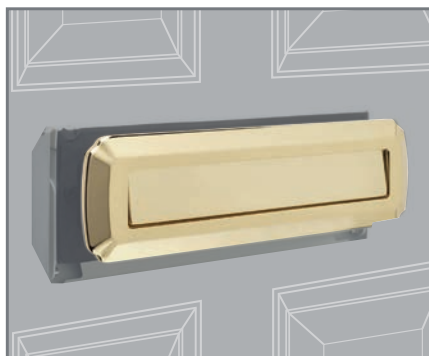

Available in the range of Fab&Fix Hardex finishes, you can mix and match to find a colour combination that suits the individual door.

Anti-snap flap opens to 180 degrees with a fully sprung return giving clear access for A4 mailings

The ranges

Nu Mail Shield

Heritage Shield

Architectural Shield

The widest range of TS 008 solutions, beautiful Fab&Fix styling to match with the Classic, Heritage and Architectural ranges. So whatever style of furniture you are using we have a TS 008 solution for PAS 24 doors to match.

Thoughtfully designed

How it works...

Deflection shield

With clear access for postal items, the design of the internal flap skilfully manoeuvres post into the home but prevents any access to keys with a hook.

In protection mode, the inside flap is angled to cleverly shield against any unwanted intruders attempting to 'fish' through the door.

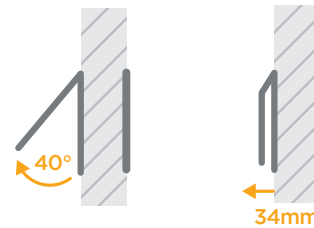

Protecting the door handle, cylinder and belongings inside the home from manipulation.

44 - 70mm

Suitable for use on 44mm -70mm thick timber and composite doors.

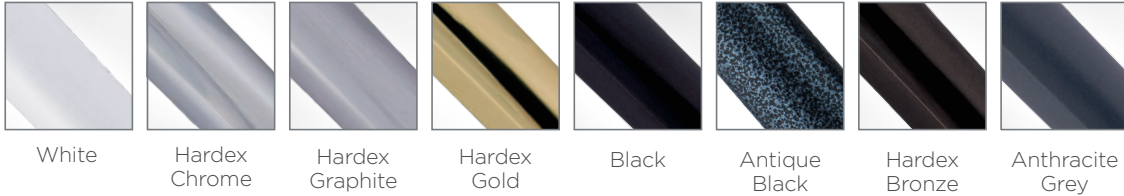

When open, the flap is restricted to 40° protecting the property within, automatically closing when not in use to prevent damage to interior walls. With a projection of only 34mm, Shield provides a stylish slimline aesthetic to the inside of the door.

Supplied separately to suit most interior and exterior door finishes, the internal and external sections of the letterplate can be mixed and matched together in any combination.

We wrote the book on Perfectly Matching Hardware

With quality and durability that you can see and feel in a choice of Fab&Fix perfectly matching suited finishes. The Shield range matches over 200+ hardware products in our portfolio. For a wide range of door solutions whatever the application, style or finish you are looking for.

The **Nu Mail Shield Letterplate** has been independently tested to the CertifiRE for 30 and 60 minute fire doors.

The Shield range has been independently tested to the latest TS008:2022 security standards for doors and is approved by Secured by Design.

PAS 24:2022 test standards now require an external door fitted with a letterplate to meet TS008: 2022 as part of your certified PAS 24 door package.

To order your Shield letterplate please refer to individual data sheets for part codes.
