

# Fab&Fix

Spoilt for choice...

## BERWICK

Expertly designed. Independently tested.

**ERA**  
TYMAN group

The Fab&Fix Berwick is a high performance 2 star security door handle that has been expertly designed to deliver lasting protection for your door.

Created to be functional and yet elegant, the handle backplate creates a barrier to protect the cylinder from an attack.

When used in conjunction with the ERA 1\* anti-bump cylinder, the combination meets the **recommended TS 007 3\* security level**, to defend against an opportunist burglar.

ERA's  
1\* Anti-bump  
Cylinder

## Expertly designed

Berwick's sculptured backplate discourages any unwanted attention from mole grips, as the clever shape makes gripping the backplate difficult and removal of the external handle impossible.

Within the backplate of the external handle is a hidden strengthening plate manufactured from solid forged aluminium that helps prevent the removal of the handle. The clever external backplate acts as a cylinder guard, to deny access to the cylinder preventing an attack by any would-be intruder.

## Independently tested

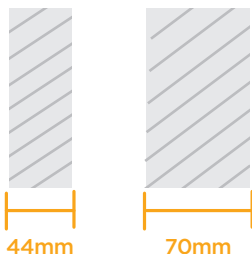

Independently tested in accordance with TS 007-1:2014+A2 Corr 2 (TS007 2\*) and to EN 1906:2012. The Berwick can be used on new doors or to upgrade the security on existing doors.

The visible 2\* TS 007 Kitemark marking on the external backplate indicates the handle's performance and acts as a key visual deterrent to prevent any unwanted interest.

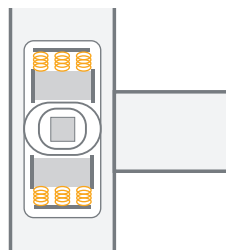

Tested to the latest version of PAS 24: 2012, the Berwick surpasses the latest security tests for high security door furniture on a new door set (with appropriate 1\* anti-bump cylinder) and has been awarded Secured By Design Police Preferred Specification.

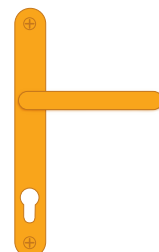

## Considerate detailing

Available in both 44mm and 70mm to suit varying door thicknesses and a wide range of PVCu profiles and composite door slabs.

The Berwick features a fully sprung lever with a sturdy feel that gives a consistent 90-degree lever return.

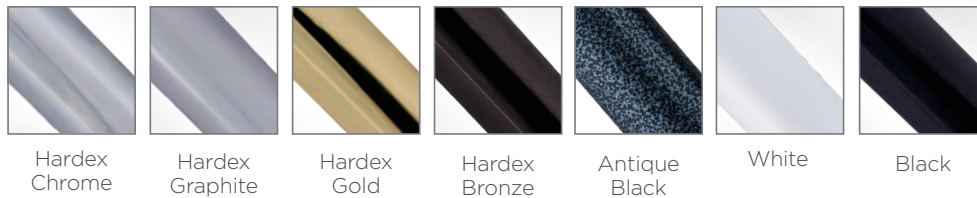

High strength M6 screws fix the handle securely to the door and the colour matched screw heads give a flawless finish, even down to the smallest detail.

# Executed with Fab&Fix style

With quality and durability that you can see and feel in a choice of Fab&Fix perfectly matching suited finishes.

The Berwick is interchangeable with the Balmoral door handle, the footprint and preparation details are the same across the two handles, making Berwick an ideal security upgrade. Berwick can also perfectly match over 200+ hardware products in our portfolio. For a wide range of door solutions whatever the application, style or finish you are looking for.
